

System 83 Revolve®

Automated Endoscope
Reprocessor

The Optimal Combination of Efficiency and Versatility

- ▶ Touchscreen All-In-One computer
- ▶ LED process status indicator
- ▶ Barcode scanning
- ▶ Large basin can reprocess 2 endoscopes at once, increasing efficiency
- ▶ Space saving compact footprint
- ▶ Able to process Pentax, FujiFilm, and Olympus flexible endoscopes
- ▶ Validated using a reusable OPA disinfectant for low per-cycle operating costs
- ▶ Hands-free operated process lid
- ▶ Ultrasonic wash cycle using validated Tergal 800 Detergent
- ▶ Individualized channel adaptation
- ▶ Channel monitoring detects fluid flow to each channel
- ▶ Provides comprehensive data reports along with a print-out for each cycle

The System 83 Revolve® is a versatile AER offering a unique combination of 2 scopes per cycle for maximum efficiency, cost-effective processing, and space-saving design.
